 LIVRE intitulé: « RÉFLEXIONS POLITIQUES sur les FINANCES
 et le COMMERCE. » 2 vols. 12° calf. PARIS: 1740.

*** This *very rare* work contains an exceedingly interesting account of the famous Mississippi scheme projected by the celebrated JOHN LAW.

« M. DU VERNEY, the author, besides being an able writer, was a skilful and successful financier. Having associated VOLTAIRE with him in some of his speculations, he made a considerable fortune for his celebrated friend. »—McCULLOCH.

« The idea of the possibility of multiplying *paper money* to almost any extent, was the real foundation of what is called the Mississippi scheme, the most extravagant project both of banking and stock-jobbing that perhaps the world ever saw. The different operations of this scheme are explained so fully, so clearly, and with so much order and distinctness, by MR. DU VERNEY, in his *Examination of the Political Reflections upon Commerce and Finance* of MR. DU TOT, that I shall not give any account of them. »—SMITH, *Wealth of Nations*, edit. OXFORD, 1869, VOL. I, p. 318.

*** BEST EDITION. VERY RARE.

« LAW first published his theory in a tract, called *Money and Trade Considered*, at Edinburgh in 1705. He was the son of a goldsmith, and of dissipated habits, but of an extremely acute intellect ; and up to a certain length, his views are sagacious and correct—much more so, indeed, than those of many writers of the present day. He begins by many very sound and acute remarks on the value of commodities, and the causes of their change of value. He describes the qualities which fitted *Silver* to be used as money, above every other commodity. He points out with much detail the *fraud* and inutility of tampering with the currency. Nothing can be more judicious and sound than his remarks upon credit—that it must always vary in proportion to the metallic basis it is built upon ; and up to this point, his sagacity and penetration are in advance of the doctrines of a century later.»—MACLEOD, *Elements of Political Economy*, p. 416-18.

. «The great value of LORD OVERSTONE writings, both in a scientific and practical point of view, has been often acknowledged by the highest authorities, and is too obvious to be questioned by any one entitled to form an opinion upon the interesting subjects of which they treat. Owing, however, to their having been published at very different times, and in very different ways, in *Pamphlets*, in *Letters* to the Editor of *The Times*, and as *Evidence* before Parliamentary Committees, their collection has become all but impracticable, and there was every prospect, unless measures were taken for their preservation, that some of them would be entirely lost. In view of preventing such an undesirable contingency, I suggested to his Lordship the desirableness of his allowing them to be collected and *printed for distribution among his friends*; and to this he was good enough to consent.»—McCulloch.

*** «This work was written at the request of ALEXANDER, Emperor of Russia, for the instruction of his brothers, the Grand Dukes NICHOLAS and MICHAEL. It contains various *Disquisitions* on important subjects, some of which have received but little attention from the English and French economists. Among others, the account of *Slavery* in Ancient Rome and in modern Europe, particularly Russia, and of the *Paper Money* of the different Continental States, are extremely interesting and valuable. We said of this work about twenty years ago, that «without the remotest intention of depreciating the labours of others, we conceive we are fully warranted in placing it at the head of all the works on Political Economy ever imported from the Continent into England ;» and we do not know that we have any very good reason for being at present of a different opinion.»—McCULLOCH.

« This work embodies a great mass of information with respect to the prices of most articles, and the commercial and pecuniary history of the empire during an eventful period of over half a century. MR. TOOKE's great experience as a merchant, and his intimate acquaintance with the principles of *Economical Science*, have enabled him to disentangle and clear up some very complicated phenomena, and to throw a great deal of light on most of the subjects within the range of his inquiries. It is a standard work; and is valuable alike to practical and speculative inquirers.»—McCULLOCH.

« All *Economists* profess that the illustration of *facts* is quite as important in the method of their science as the discussion or elucidation of principles. In my opinion it is even more important, because these facts form the basis for economical inductions. Very few authors, however, have combined exact reasoning with plentiful illustration; very few, however much they have professed to defer to experience, have undergone the drudgery of patient observation. ADAM SMITH, and TOOKE are eminent exceptions.»—J. A. THOROLD ROGERS.
